

Fleet Management

A guide to outsourcing your fleet

sgfleet

Fleet Management

As you grow your business, your fleet will grow as well. Managing a small to medium fleet can take up plenty of your time as you juggle conflicting priorities.

We offer a complete range of fleet management services to provide you with the right expertise and solutions to manage down the whole-of-life cost of your fleet, improve driver behaviour to comply with WH&S requirements and reduce the burden and cost of your internal administration. Conveniently, you will be able to track your progress towards these objectives via our innovative online reporting tools.

The first step is to develop an efficient and optimised fleet and management process for your business in consultation with yourself. This process includes the following services.

Pricing & quoting

Selection of fit-for-purpose vehicles, pricing, quoting and purchasing at reduced costs

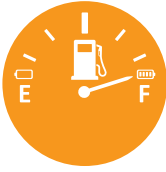

Funding

Funding options include fully maintained operating leases or customer-sourced funding where appropriate

Procurement & delivery

Management of vehicle purchase process from funding settlement through to delivery

Fuel management

Prompt delivery of fuel cards with monitoring and online reporting of fuel costs

Toll management

Monitoring and online reporting of toll costs, consolidated on monthly invoice

Maintenance management

Cost and risk reduction overseen by highly trained maintenance team, with automated service reminders

Roadside assistance

24 hours a day, 365 days a year assistance, anywhere in New Zealand

Accident management

End-to-end management, from initial accident reporting to return of repaired vehicles, reducing repair times and increasing productivity

Registration management

Management of registrations by specialists and elimination of unregistered vehicles

Infringement management

Management of infringements such as speeding and parking fines and monitoring of driver history

Reporting & invoicing

Monthly consolidated invoice and numerous customisable reports available 24/7

Contract revision

Continuous tracking of fleet to minimise depreciation and maintenance costs and enact contract revisions where appropriate

Changeover consulting

Various end-of-lease options and assessment of options 6 months prior to lease expiry to ensure smooth transition to new lease

Vehicle disposal

Proprietary disposal method with full control over entire sale process ensuring minimisation of lease restoration costs

eStart

Our Zero Emission Vehicle Transition Plan helps you plan and budget for transitioning to a zero emission vehicle (ZEV) fleet

Telematics

Information on vehicle location, driving routes, speeding, harsh braking, accelerating and cornering, vehicle roll-overs with an optional dash-mounted duress button, alerting pre-designated recipients
